## Profile & Professional Summary

Results-oriented Software Developer with over **5.5+ years of experience**, skilled in technical leadership, effective communication, and impactful presentations. Proficient in managing the full project **lifecycle, from initial design through implementation to integration.** Dedicated to leveraging extensive programming expertise in .NET technologies, including C#, ASP.NET MVC, MS SQL, Web APIs, Console Applications, and Windows Services, to develop and implement robust applications.

Demonstrated proficiency in backend module development using .NET Web API and front-end development with HTML, JavaScript, and Angular (7 and above), creating dynamic user interfaces from scratch. Possesses domain experience in **healthcare, crypto exchange, compliance projects, and fintech**, with a focus on delivering solutions that adhere to **regulatory standards and audit points**.

Skilled in utilizing Microsoft Azure services for **CI/CD, infrastructure management**, and API gateway management, enhancing application deployment and scalability. Experienced in collaborating with cross-functional teams to ensure compliance and improve the overall customer onboarding journey. Committed to delivering high-quality solutions that meet both technical requirements and compliance obligations while seeking challenging opportunities for exposure to new technologies and domains.

## Technical Skills

**Languages:** C#
**Internet Technologies:** Asp.Net-MVC, Web-API, JavaScript, typescript, Angular 7 and above versions
**Windows Technologies:** Window Service, Console App.
**Frameworks:** .Net Framework 4.5 & Above, .Net-Core 2.0 & Above, Entity Framework
**IDE:** Visual Studio, Visual Studio Code
**Code Versioning:** TFS, Git, Azure
**Operating system:** Windows, Linux
**Database:** MS-SQL, My SQL, PostgreSQL.
**Others:** RabbitMQ, Microsoft Service Bus, Web Socket, Multi-Threading, N Unit-Testing, Redis, JWT, Advanced Installer.

## Project Summary

### (1) Partner Lending Integration API

| | |
|---|---|
| **Project Name** | Partner Lending Integration APIs |
| **Company** | Bajaj Finserv Ltd. |
| **Technologies & Features** | .Net 6,7, 8 , Sql Server, PostgreSql , Azure service bus |

| | |
|---|---|
| **Roles & Responsibilities** | • Requirement Discussion, Solutioning the structure for project, Compliance and Audit requirements<br>• Developing backend api and database structure<br>• Code review<br>• Deployment and bug fixes |
| **Duration and Team Size** | 6 Months Team of 4 |

**Description:** Developed and implemented a suite of **Partner Lending Integration APIs** used by major market payment service providers to streamline and automate the booking and servicing of **personal** and **business loans**. These APIs enable seamless integration between lending platforms and external payment service providers, facilitating real-time loan origination, payment processing, and ongoing loan servicing. Key features include:

- Automated processes for personal and business loan applications, approval workflows, and real-time decisioning.
- APIs for tracking loan balances, payment schedules, and customer communications.
- Designed for high scalability to handle large transaction volumes for enterprise-level payment service providers.
- In first month of release more than **150 loans disbursed approx**.

**(2) B2C-Experia Portal**

| | |
|---|---|
| **Project Name** | B2C-Experia Portal<br>(https://www.bajajfinserv.in/myaccountLogin) |
| **Company** | Bajaj Finserv Ltd. |
| **Technologies & Features** | MVC .Net 5, Sql Server, Angular 10, Azure services |
| **Roles & Responsibilities** | • Requirement Discussion, Solutioning the structure for project , Compliance and Audit requirements<br>• Developing backend api and database structure<br>• Code review<br>• Deployment and bug fixes |
| **Duration and Team Size** | 15 Months, Team of 2 |

**Description:** The B2C-Experia Portal is a customer-centric platform that allows users to manage various financial services, including loans, EMIs, and fixed deposits offered by Organisation.

- Created Multiple Modules i.e (**Login Module/Offers Module/Search Module**)
- Created a Horizontal Structure for (Offers/search module) i.e(Can be used in any module) with just importing the package.
- Implementation of SSO (Single Sign On) i.e no authenticaton is asked once the user logged in to website from any of the pages of Bajaj Finserv.
- Ensured adherence to **compliance points and audit requirements raised by regulatory bodies** for the online onboarding journey of customers in the fintech and banking sectors. Collaborated with cross-functional teams to implement best practices that enhanced customer experience while meeting stringent regulatory standards.
- Worked on Angular 10 (Esop Module) for buying and selling the esops realtime with exchange, which is integrated in App and web.

**(3) B2C-QR Branch**

| | |
|---|---|
| **Project Name** | B2C-QR Token Generation<br>B2C-QR Gold Loan Branch Token Generation |
| **Company** | Bajaj Finserv Ltd. |
| **Technologies & Features** | MVC .Net 5, Sql Server |

| | |
|---|---|
| **Roles & Responsibilities** | ● Requirement Discussion, Solutioning the structure for project<br>● Developing backend api and database structure<br>● Code review<br>● Deployment and bug fixes |
| **Duration and Team Size** | 1 Months Team of 1 |

**Description:** This is website that is used for generation of service token from all the branches across India.

### (4) Communication Governance & Campaign Management Portal

| | |
|---|---|
| **Project Name** | Communication Governance Portal<br>Campaign Management Portal<br>(**Windows Services**) |
| **Company** | Bajaj Finserv Ltd. |
| **Technologies & Features** | .Net 8, SQL Server, Postgre SQL, Boot Strap |
| **Roles & Responsibilities** | ● Requirement Discussion with business, Solutioning the structure for project<br>● |
| **Duration and Team Size** | 6 Months Team of 1 |

**Description:** Developed an in-house Communication Governance project & Campaign Management Portal to manage communications and campaigns via multiple channels (WhatsApp, Email, SMS, Call Center from various departments of organisation. **Windows services** developed for validation, limit checks, and data processing, ensuring efficient campaign management.

- Streamlined process for adding new campaigns..
- **Windows services** for background processing of all the campaigns developed for validation, limit checks, and data processing, ensuring efficient campaign management.
- Centralized platform for creating and tracking campaigns department-wise.
- Campaign Portal for creating the new campaign , enable and disable
- Communication portal for management of communication of campaign accross organization.

### (5) Presidio

| | |
|---|---|
| **Project Name** | Presidio |
| **Company** | Mugenesys (I) Pvt Ltd |
| **Technologies & Features** | C#, .Net Core Api, Ms-SQL, Swagger, Ocelot API Gateway |
| **Roles & Responsibilities** | ● Requirement Gathering from client<br>● Code review<br>● Deployment and bug fixes |
| **Duration and Team Size** | (6 Months) Team of 4. |

**Description:** This is a web based project used for Ordering the services or products from Different vendors from the common platform.

- Migration of Existing Asp.Net Code to .net Core Micro-services structure.
- Implementation of API Gateway for connecting different micro-service from single point.

**(6) MySelfCare**

| | |
|---|---|
| **Project Name** | MySelfCare<br>(http://3.94.26.155/) – Patient Portal<br>(http://3.94.26.155:8081/login) – Admin Portal |
| **Company** | Mugenesys (I) Pvt Ltd |
| **Technologies & Features** | C#, .Net Core Api, My-sql, Swagger |
| **Roles & Responsibilities** | • Requirement Gathering from client<br>• Developing backend api and database structure<br>• Code review<br>• Deployment and bug fixes |
| **Duration and Team Size** | (5 Months) Team of 2. |

**Description:** This is a healthcare which provides the online appointment booking and Video conferencing between client and patient.

- Migration of Existing(Patients Portal) from Laravel to .Net Core API which was used by mobile team as well.
- Enhancement in existing Portal of Appointment Booking, Video Conferencing between the patient and Doctor.
- Developed Admin Panel in Angular 7 for managing the patients, doctors, Appointments, etc.

**(7) SuccessGyan**

| | |
|---|---|
| **Project Name** | SuccessGyan (https://partner.successgyan.com/) |
| **Company** | Mugenesys (I) Pvt Ltd |
| **Technologies & Features** | C#, .Net Core 3.1 Web Api, Angular 10, JWT, ZOHO,Zoom integration |
| **Roles & Responsibilities** | • Requirement Gathering and approval from client<br>• Design and developing backend api<br>• Assigning and managing team and assignments<br>• Support , Deployment and bug fixes |
| **Duration and Team Size** | 6 Months. Team of 3. |

**Description:** This is a platform provided to well-known speakers around the world for marketing purposes.

- This website has marketing collateral for sharing speaker's upcoming events and tracking their respective shares through zoho integration.
- Commission calculation for partners who have attended the events .

**(9) Real Time Trade Viewer (RTTV)**

| | |
|---|---|
| **Project Name** | RTTV<br>(http://rttv.binaryticks.com/) – Client Panel<br>(http://rttvadmin.binaryticks.com/) – Admin Panel |
| **Company** | Mugenesys (I) Pvt Ltd |

| | |
|---|---|
| **Technologies & Features** | C#, .Net Core 3.1 Web Api, Angular 8, MS SQL |
| **Roles & Responsibilities** | ● Requirement Gathering and approval from client<br>● Design and developing backend api and Windows service<br>● Support , Deployment and bug fixes<br>● Technical document of all request response used in API and Socket. |
| **Duration and Team Size** | 4 Months. 1. |

**Description:** This is a platform provided to display the trades and order placed by different clients.

- On the basis of groups the manager are mapped trades and orders are displayed on client panel and for broadcasting the deals and orders web-socket is implemented.
- Admin Panel developed to create the new user to have access to client portal and map the groups for which the trade to be visible to those clients.

**(10)** ***DigitalTicks & Crex***

| | |
|---|---|
| **Project Name** | Digital Ticks & Crex ( https://www.digitalticks.com/ ) ( https://demo.crex.in/ ) |
| **Company** | Mugenesys (I) Pvt Ltd |
| **Technologies & Features** | C#, .Net Core Console, MS-Sql, Web Socket, Rabbit MQ, Win -service, MultiThreading |
| **Roles & Responsibilities** | ● Requirement Gathering for my module<br>● Developing, designing database and backend services<br>● Code review<br>● Technical documentation of my module |
| **Duration and Team Size** | 15 months. Team of 3. |

**Description:** This is the first ever commodity – crypto exchange well designed by trades for traders. It is just not another crypto to crypto exchange but is also a semi algorithm platform provider on its own. Its fully robust product which can handle heavy volatility of the crypto markets as well as commodity markets which can handle up to 1,00,000 orders per second.

- Worked on OMS Module/ RMS Module / Chart Modules. The module is multithreaded with support of RabbitMQ ,Websocket , Caching for Authentication and Web API.

## Work Experience

**(1)** Bajaj Finserv Limited Senior Software Engineer
April-2022 to Present (1.6 year)

**(2)** Mugenesys Software Pvt. Ltd. (Andheri) Software Engineer
May - 2019 to April - 2022 (2.11 years)

**(3)** Netscribes (I) Pvt. Ltd
Market Research Associate
Oct-2017 to Oct-2018 (1 year)

## Education

**Bachelor in Information Technology (BscIT)** Graduated, 2017

| | |
|---|---|
| Sathaye College (Mumbai University), Vile Parle | 75 % |
| **HSC** | Completed, 2014 |
| Elphinstone College (Mumbai University), Churchgate | 70.40 % |
| **SSC** | Completed, 2012 |
| Purushottam High School(Maharashtra Board), Bandra | 82 % |

## Personal Details

| | | |
|---|---|---|
| Father's Name: | Mr. Rakesh Singh | Marital Status: Single |
| Birthday: | February 25, 1997 | Nationality: Indian |
| Gender: | Male | |
